7. Revaluation Reserve (RVLRV)
8. Share Capital ? Other (SCO)
9. Treasury Stock ? Total ? All Capital (TSTK)
10. Unappropriated Net Profit (Shareholders' Equity) (UNNP)
11. Equity Reserves ? Other (ERO)

This item excludes all noncontrolling interests.

**Summary (Restated) Data**

Summary (Restated) data is now defined by Data Format (DATAFMT). Summary data can be accessed using a combination of a data item and DATAFMT. For example, the SEQR data item will now be found in the SEQ data item with a Data Format code of summ_std.

Summary data is collected from summary presentations reported by the company. It allows you to compare current years with prior years that may be restated for mergers or acquisitions, accounting changes or discontinued operations. The summary data series contains the most commonly-reported Income Statement and Balance Sheet items.

SEQ in SUMM_STD data format excludes redeemable preferred stock.

**Bank and Thrift**

There is an average value for bank and thrift.

The value represents the unweighted average of total stockholders' equity for the quarter. For 1974, 1st quarter and succeeding quarters, quarterly averages are bank reported. Quarters prior to 1974, 1st quarter will be not-available.
